Story

Before the madness, before the terror, and before the disappearances there were horrible events occurring throughout Lara's home town. The horrid events started to occur at Lara's graduation high school party three days into summer. She was drunk and passed out on the middle of her bed with the Vodka spilling onto the rug under her bed. In deep sleep she dreamed of war, torture, and suffering. She first thought it was a side-effect of all the Vodka she drank, but she soon came to realize that it wasn't when she finally woke up five hours later. Lara woke up (still barely able to move) and walked out into the main hall and noticed all her guests were lying on the tables and on the ground. She thought they all passed out, but then Lara saw blood...and lot's of it. All of her friends and colleagues were dead, and some were even brutally killed. Although Lara's graduation party was ruined, she decides to find the bastards who killed her friends and finish them once and for all. But what she finds out is deadlier than she ever imagined...

Installation and WARNINGS

1. Just open up tomb4.exe and play!

WARNINGS: PLEASE DO NOT USE ANOTHER TOMB4.EXE OR ELSE YOU WILL NOT BE ABLE TO COMPLETE THE GAME! ALSO DO NOT DELETE OR MOVE THE EFFECTS.BIN FILE OR ELSE THE GAME WILL CRASH!

Bugs

1. In the basement level, there is a switch which you pull down in a little room and it raises a block. Only use it once or a bug will occur where an invisible door is created. This stops you to get the torch from the block.

Hint

A big hint I am going to give out to players of Purgatory 2 is that you should save some ammo for the final boss. ;)
