ABOUT THIS TEASER

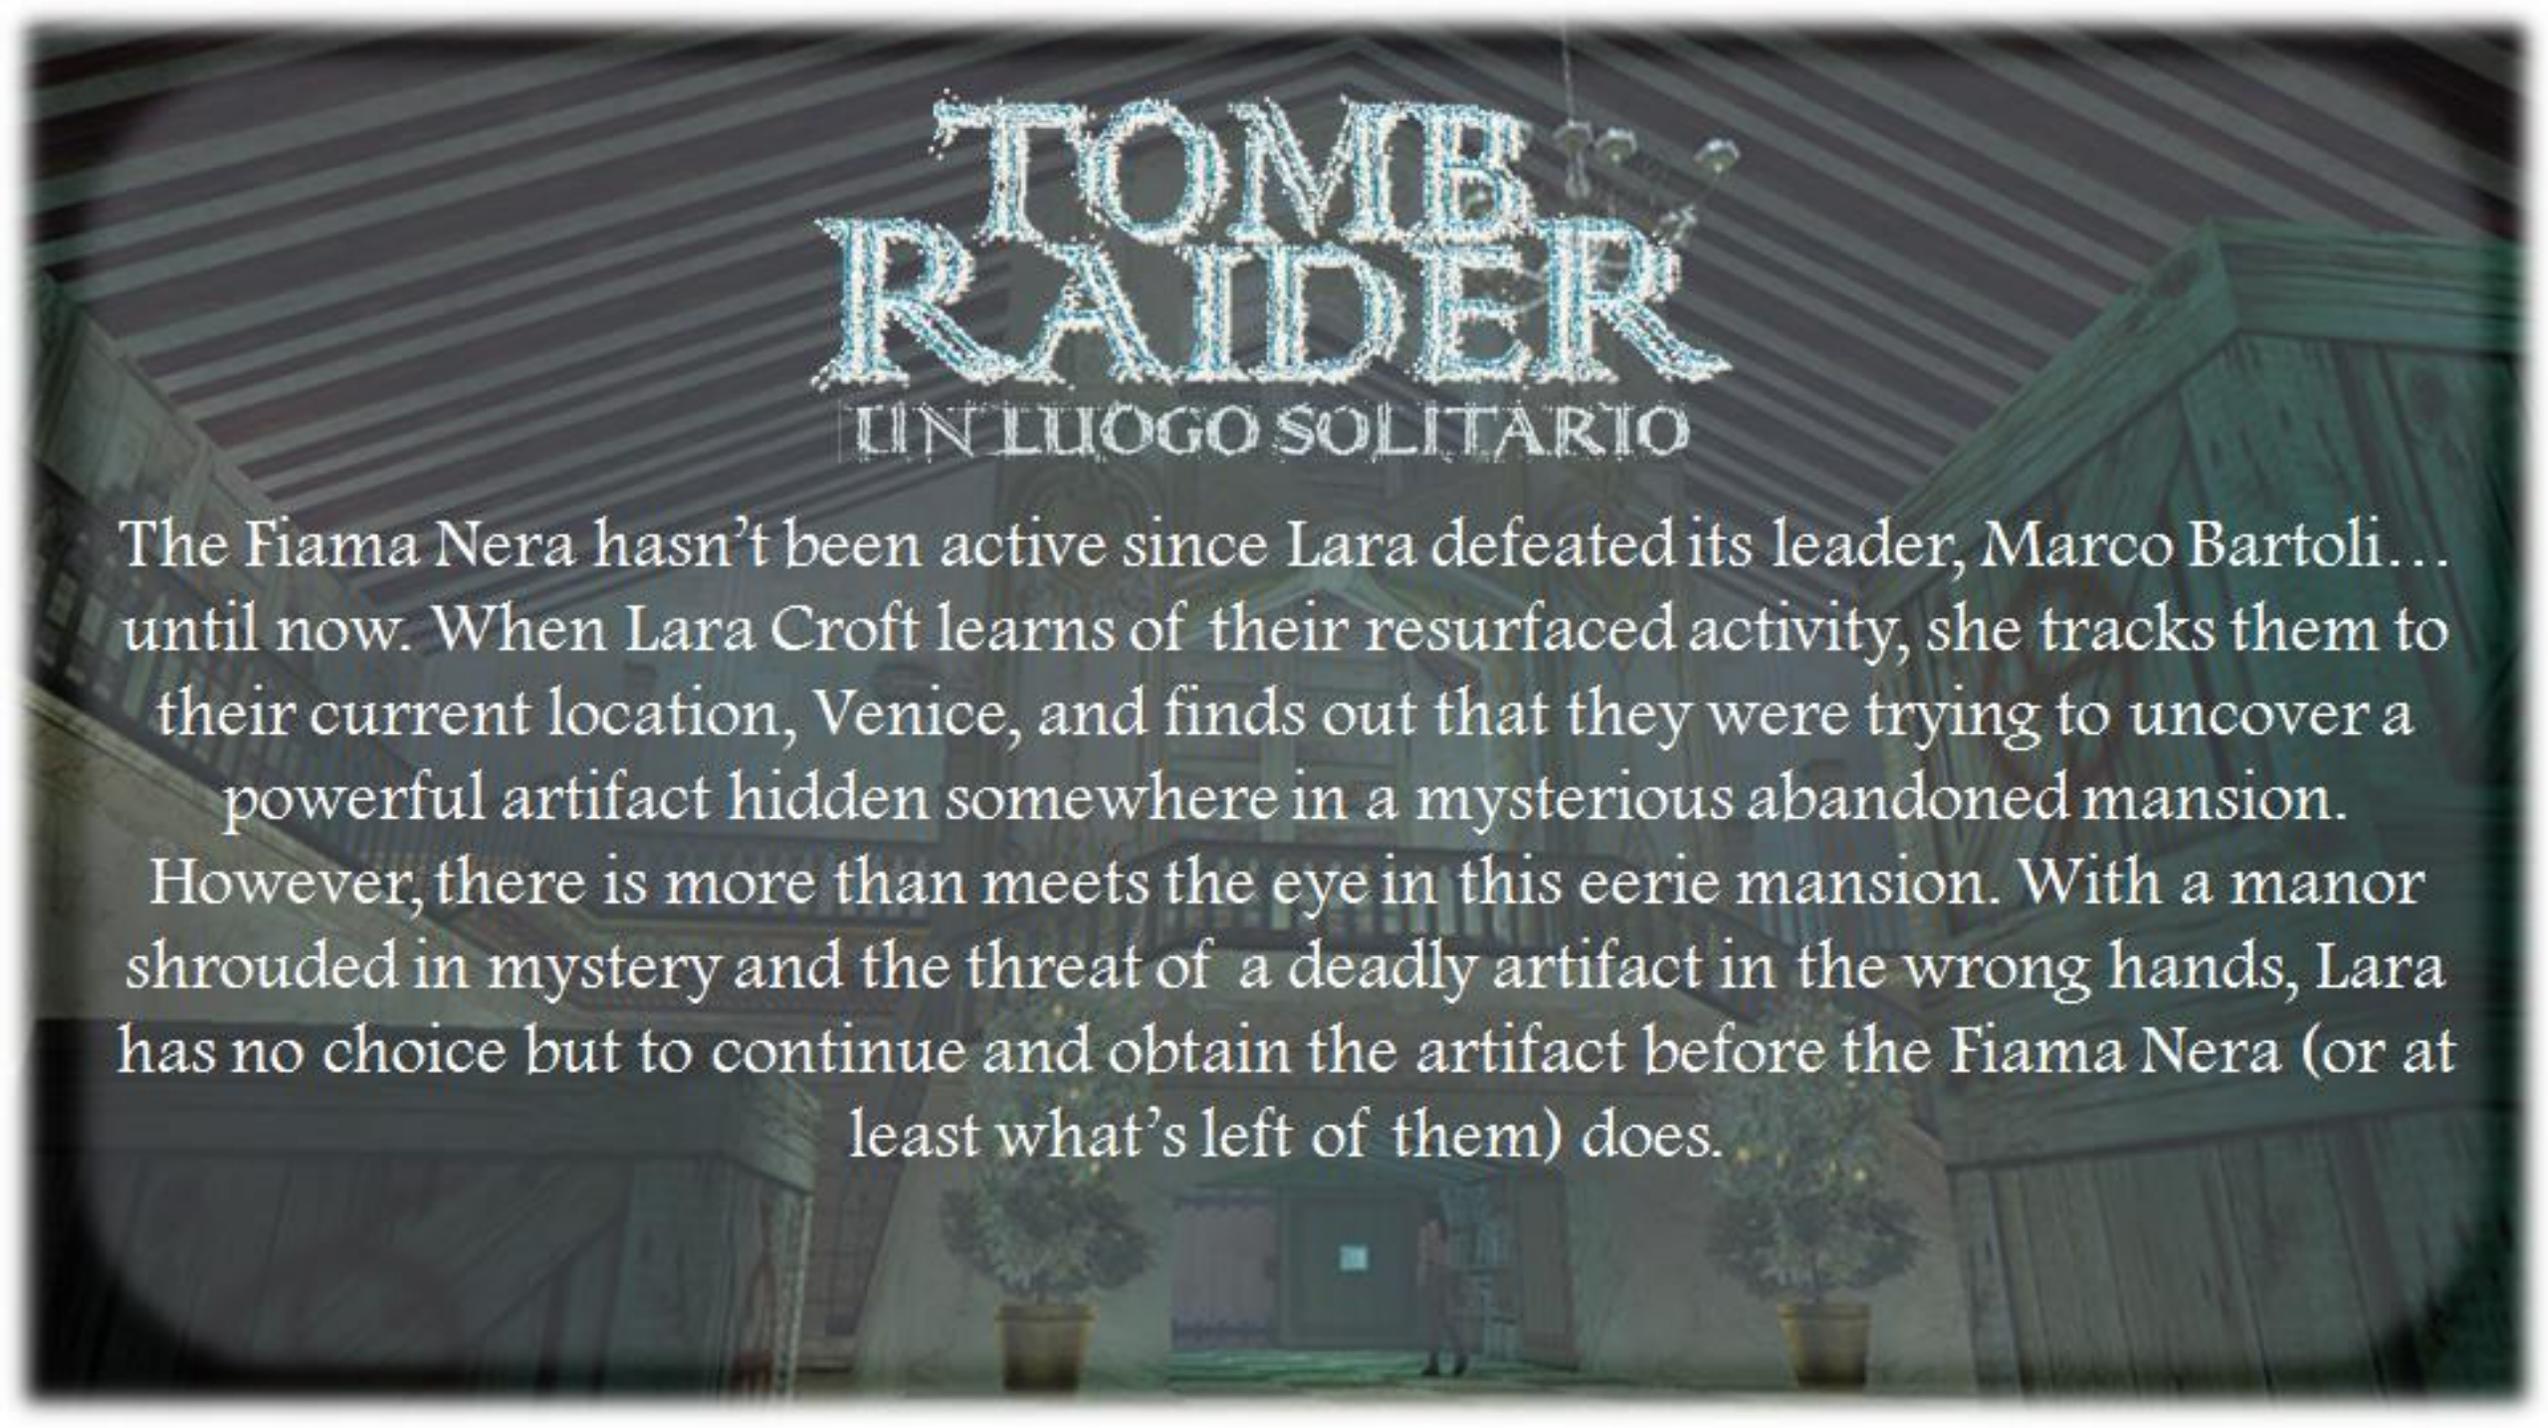

Thank you for downloading this teaser!

This is a teaser of an old project I was working on from 2010-2012 called *Un Luogo Solitario*. I put this project on hold a long time ago to work on other levels, but I wanted to release a playable teaser of this project.

Things are likely to change between this demo and the final version.

Enjoy!

The background of the image is a screenshot from the video game Tomb Raider: The Last Revelation. It shows a dark, atmospheric interior of a mansion with a high, vaulted ceiling. The lighting is dim, with some light sources creating a misty or foggy atmosphere. In the center, there is a doorway leading to another part of the mansion. Two potted plants are visible in the foreground, one on each side of the doorway. The overall mood is mysterious and eerie.

TOMB RAIDER

UN LUOGO SOLITARIO

The Fiamma Nera hasn't been active since Lara defeated its leader, Marco Bartoli... until now. When Lara Croft learns of their resurfaced activity, she tracks them to their current location, Venice, and finds out that they were trying to uncover a powerful artifact hidden somewhere in a mysterious abandoned mansion.

However, there is more than meets the eye in this eerie mansion. With a manor shrouded in mystery and the threat of a deadly artifact in the wrong hands, Lara has no choice but to continue and obtain the artifact before the Fiamma Nera (or at least what's left of them) does.

SEARCHING FOR CLUES... (DEMO)

This is a teaser of the level *Searching for Clues...*, which contains the first third of the level. Since this is the demo version, it has been modified from the final version. There are no secrets in this level.

Note: The teaser officially ends when two masks are placed in the altar. There is no actual finish trigger, so the player can continue to explore the level.

LABRYNTH (SCRAPPED LEVEL)

This is a rather short level, because it is a scrapped level.

However, a portion of this level was remade and incorporated to another one of my levels.

There is one secret in this level.

BUGS

- There are some texture bugs in a couple areas in the levels.
- In the title screen, there will be a strange level jump bug if it is left idle for too long.
